PROFESSIONAL SUMMARY

Entry-level IT support student with hands-on Windows troubleshooting, practical scripting for repetitive tasks, and portfolio projects in desktop utilities and security tooling. Strong communicator developed through three years of customer-facing work; comfortable with CLI, documentation, and systematic problem-solving. Seeking an internship or tier-1 support role to grow into enterprise desktop and endpoint environments.

CORE SKILLS

- Ticket triage, root-cause isolation, end-user issue resolution
- Basic networking: IP renew/release, interface diagnostics, adapter checks
- Windows 10/11 troubleshooting - hardware, software, and drivers
- Credential and account management workflows with error handling
- CLI tooling and PowerShell/Python automation for repetitive tasks
- Clear documentation: help text, structured output, repeatable procedures
- Desktop utility scripting: file ops, batch rename, app launch workflows
- Cross-platform awareness (Windows primary; Linux/macOS compatibility paths)

WORK EXPERIENCE

DreamBikes — Milwaukee, WI

Team Member / Service Technician | Mar 2025 – Present

- Apply systematic hardware diagnostic methods to isolate, troubleshoot, and resolve mechanical failures on 10+ complex assemblies weekly.
- Provide Tier-1 technical communication, translating complex mechanical and repair issues into clear, actionable explanations for customers.
- Mentor and onboard new incoming interns on daily operational workflows, service standards, and troubleshooting procedures.
- Manage ticketed-style repair workflows, balancing high-priority turnarounds with accurate documentation to maintain SLA expectations.

Boys & Girls Club — Milwaukee, WI

Bike Repair Intern | May 2024 – Mar 2025

- Performed root-cause analysis and component-level repairs on mechanical systems under strict turnaround times.
- Educated end-users on preventative maintenance, basic diagnostics, and operational safety to reduce recurrent issues.
- Maintained organized workspace inventory, tracking tool deployment and component replacement logs.

Qdoba — Milwaukee, WI

Restaurant Team Member | Apr 2024 – Aug 2024

- Delivered high-volume customer support in fast-paced environments while adhering to strict operational SLAs and quality guidelines.
- Collaborated with cross-functional team members to maintain real-time queue management during peak traffic hours.

TECHNICAL PROJECTS

VaultPass - Offline Password Manager [Python, Fernet, PBKDF2, Tkinter]

- Built fully offline, single-file credential vault for Windows and Linux with PBKDF2-HMAC-SHA256 (480 000 iterations) + Fernet AES encryption.
- Features: passwords, cards, addresses, autofill HUD, clipboard auto-clear (30 s), advanced search syntax, single-exe packaging.
- Demonstrates: desktop app architecture, safe local credential handling, cross-platform compatibility, UX decisions for non-technical users.

Support Utility Toolkit - Python CLI Scripts [Python, argparse, subprocess, sockets]

- Keyword-based file parser, folder-wide app launcher, and bulk filename cleanup with robust argument parsing and defensive error handling.
- Network adapter helpers: interface inspection, IP renew/release automation, before/after status messaging for Wi-Fi triage scenarios.
- Windows and Linux/macOS compatibility paths included; scripts built with help text for non-technical reuse.

custom2fa - Offline TOTP Authenticator [Rust, AES-256-GCM, PBKDF2, Tkinter/Slint]

- RFC 6238-compliant TOTP generator built in Rust; fully offline with encrypted vault (.c2fa), GUI + CLI, QR and OTP URI import.
- OS keychain integration (Windows Credential Manager); encrypted backup/restore with separate passphrase.
- Demonstrates systems-level thinking about credential security and safe offline tooling design.

EDUCATION & CERTIFICATIONS

- College; Milwaukee Area Technical College | IT Computer Support Specialist | Associates | GPA 3.2 | Feb 2025 – May 2027
- Certification; Microsoft Enterprise Desktop Support Specialist | Completed Dec 2025
- Certification; CompTIA Competency in IT Hardware and Network Support | Completed May 2025
- Certification; CompTIA Competency in IT Software and Systems Support | Completed May 2025

TOOLS & TECHNOLOGIES

- Primary Tools & Languages: Python, PowerShell, Git/GitHub, Linux (Ubuntu/Kali), VirtualBox
- Analysis & Scripting (Lab / Project Level): PE/ELF analysis (pefile, PESTudio), Ghidra (foundational), pytest

- Concepts & Lab Frameworks: Wireshark, Burp Suite, MITRE ATT&CK, Cryptography (Fernet/PBKDF2)
